

Axis^{AX}

Firefighter Telephones and Cabinets AV-TEL

The AV-TEL products from Advanced provides a two way, Firefighter Emergency Telephone system. Operation and control of the Firefighter Telephone system is performed at one or more Axis^{AX} Series Fire Command Centers. Indicators and controls are provided to the command center operator to: 1) provide an alert, audible, sound upon initiation of the call, 2) indicate the origin/location of the initiated call, 3) acknowledge incoming calls, 4) connect field telephones to the command center phone, and 5) select between multiple telephone risers and multiple telephones.

Whenever a Firefighter Telephone is engaged in the field, it is critical that other Firefighter Telephones connected to the same "party line" be able to clearly hear and share voice communications between them as well as with the Command Center Telephone. In addition, the telephone circuitry must be robust, such that random noise does not interfere with the voice communications.

The telephone riser circuitry is protected against opens, shorts and earth faults. With the addition of an AV-TEL-SUP module, all field telephones become addressable, so that anytime a phone is activated it is clearly identified at the Command Center. All AV-TEL models of Firefighter Stations include red "phone active" LEDs to indicate that connections to the telephone riser and to the command center phone have been properly made.

Supervision of the telephone riser circuitry and power supply is performed at the command center. Additional field wiring at the Firefighter Telephones themselves is accomplished with the addition of an AV-TEL-SUP module.

AV-TEL Firefighter Telephones are modular in design to easily facilitate field installation. The back box, door, telephone and trim kit (if required) are ordered separately.

Unique Features:

- Modular Assembly
- Key Lock or Break Glass Access
- Coil or Armored Cord
- Durable Red Finish
- 16 Gauge Steel Construction

Listings and Approvals:

- ETL ANSI/UL 864 Listed: 101564744NYM-001
- UL Listed: file UOXX.S2580
- CSFM Approved: 7165-1713:0101
- NYCFCO COA #6105

Ordering Information

AV-TEL-BB	Firefighter Phone Backbox (red). Dimensions: 13"H x 9"W x 4"D. 16 AWG Steel. Semi-Flush or Flush Mount. Requires Door and Firefighter Phone.
AV-TEL-D1	Firefighter Phone Door (red) magnet latch w/handle. Attaches to AV-TEL-BB. White lettering: "Emergency Telephone For Emergency Use Only."
AV-TEL-D2	Fire Warden Door (red) magnet latch w/handle. Attaches to AV-TEL-BB. White lettering: "Fire Warden Station For Emergency Use Only."
AV-TEL-D3	Firefighter Phone Door (red) with keylock (CAT-30) access. Attaches to AV-TEL-BB. White lettering: "Emergency Telephone For Emergency Use Only."
AV-TEL-D4	Firefighter Phone Door (red) with breakglass. Attaches to AV-TEL-BB. White lettering: "To Open Use Key or Breakglass."
AV-TEL-CCS	Coil Cord Standard Firefighter Phone Handset. Mounts inside AV-TEL-BB. Includes mounting plate, telephone cradle, red "phone active" LED, and mounting screws.
